EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

2.1. The Abstract of the Disclosure has been replaced with the following:

--Abstract of the Disclosure

A process for washing a substrate comprises the first step of providing a substrate and a detergent tablet wherein at least a portion of the outer surface is semi-solid, a second step of rubbing the semi-solid portion of the detergent tablet onto the substrate and a third step of inserting the substrate and the tablet in a washing machine, the wash taking place normally thereafter.--

2.2. The TITLE has been replaced with: PROCESS FOR WASHING A SUBSTRATE

STATEMENT OF REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

Claims 1-12, 14-16 have been cancelled (claims 1-9 previously cancelled in a preliminary amendment) which rendered moot the rejection of claim 15 under 35 U.S.C. 112, second paragraph; the rejection of claim 10 under 35 U.S.C. 102(e) as being anticipated by Anderson; the rejection of claims 10 and 12 under 35 U.S.C. 102(e) as being anticipated by Rowland; and

the obviousness rejection of claim 11 based upon Rowland in view of Eoga. With respect to the presently amended independent claim 13, the closest prior art to Rowland in view of Van Den Brom, has been overcome because even though Rowland, the primary reference, teaches a detergent tablet for use in machine dishwashing and laundry washing wherein the tablet comprises a compressed portion and a non compressed portion which may be in gel form, this reference fails to teach rubbing the non-compressed portion in gel form onto a substrate. Van Den Brom, the secondary reference, teaches a detergent composition in bar or stick form wherein the composition is applied to stains and spots on either dry fabric or fabric that has been dampened with water, however, Van Den Brom fails to teach a detergent tablet having at least a portion of the outer surface in semi-solid-form and fails to teach inserting the bar or stick with the fabric in the washing machine. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
